SfPUEL: Shape from Polarization under Unknown Environment Light

Youwei Lyu¹ Heng Guo¹ Kailong Zhang¹ Si Li¹ Boxin Shi²

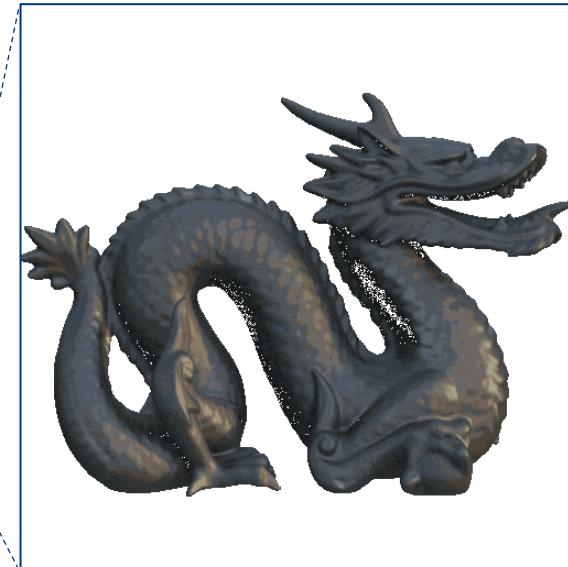

December 2024 @ NeurIPS 2024

Presenter: Youwei Lyu

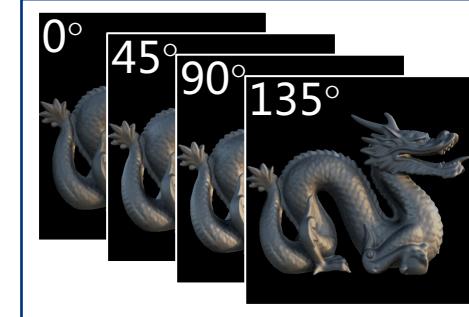

Shape from Polarization (SfP) Setup

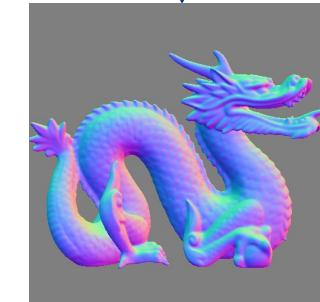

Polarizer

Polarization images

SfP

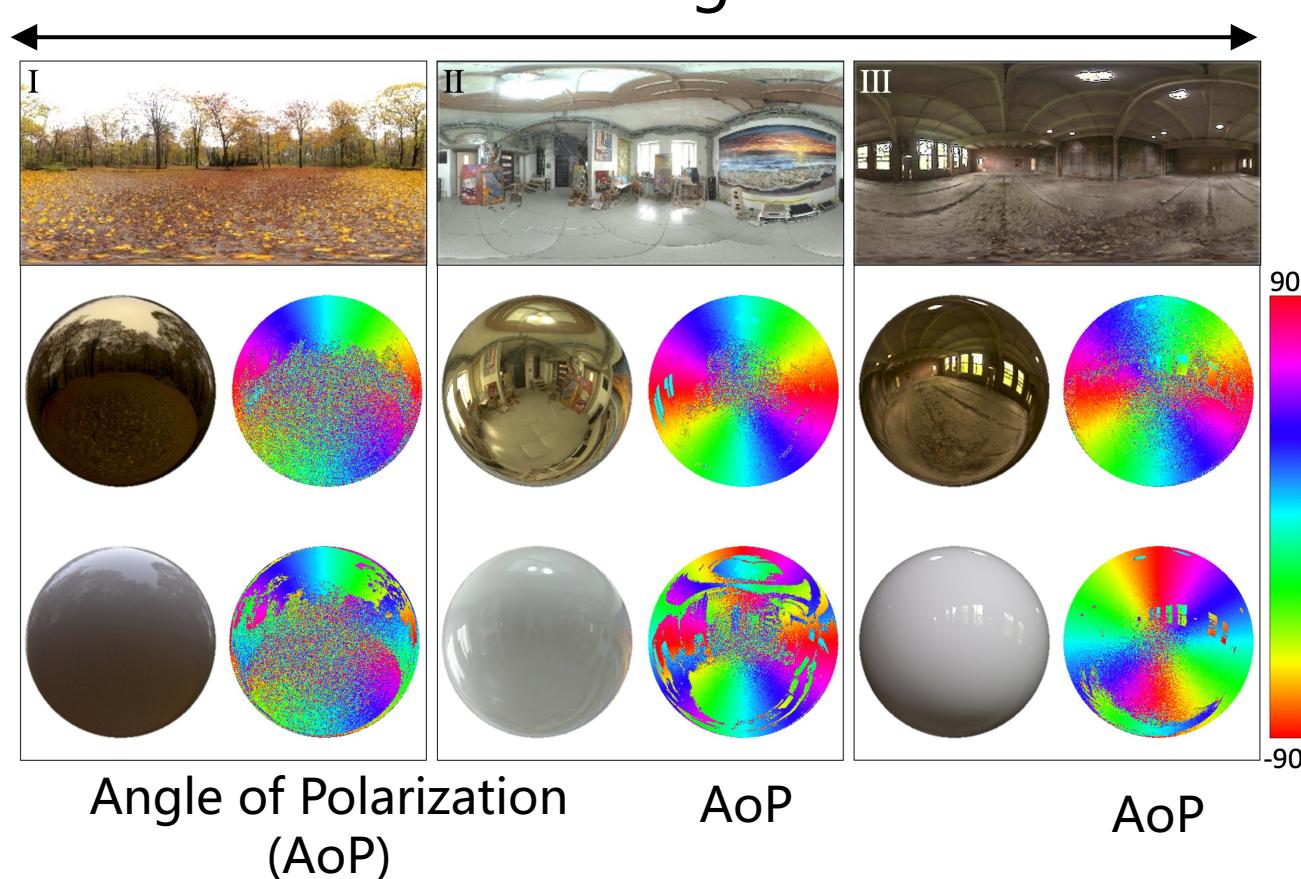

Normal map

Challenges of SfP

Dielectric

Metallic

Contributions

- Propose SfPUEL, a transformer-based framework to solve shape from polarization under general unknown environment light via global context feature extraction ;
- Jointly utilize polarimetric cues and the representative pretrained priors from PS to solve SfP for the first time;
- Solve SfP together with metallic and dielectric material segmentation, which further boosts surface normal prediction.

Integrate Pretrained PS Priors to SfP

Photometric Stereo (PS)

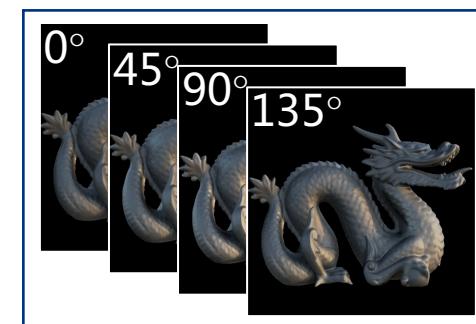

Shape from Polarization (SfP)

Consistency of PS & SfP

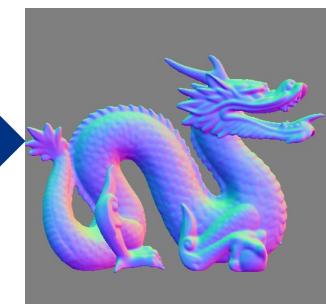

Estimate normal by radiance variations
at the same pixel position
