# Existing Physics Datasets

# Existing Physics Datasets

- ❖ Extensive geometric and solution data but **lack generative workflows** for creating new variants
- ❖ Some datasets provide generative workflows but are **2D domains with idealities**
- ❖ 3D datasets have **limited design variations**
- ❖ Datasets for **Fluid-Structure Interaction (FSI)** missing

## Dataset Specs

- 16000+ parametrized hood datapoints
- 16000 x 8 temporal solutions for each impact scenario
- 1750+ engineered curves for designing new variants
- 2500+ GenAI Text-to-CAD pairs

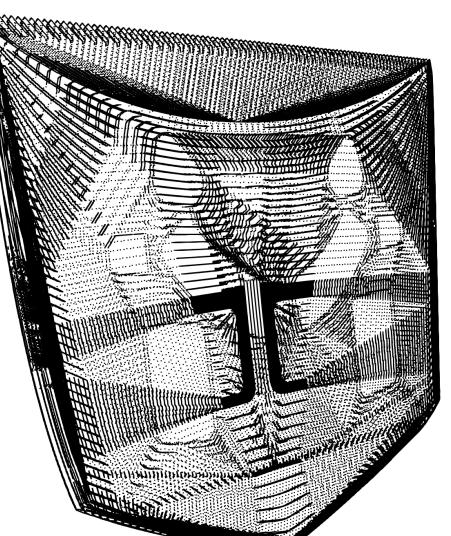

## Data Generation

- Co-Simulation workflow with CFD and FEA solvers
- Solvers are fully customizable
- Additional physics for different force scenarios possible
- Curate new 3D FSI datasets

User Input

Generate a point cloud representing a hood panel with a tapered inner ... with a minimum curve distance of 0.026 and a center distance of 0.043...

Language Model

Let me think through the requirements. We have a curve count of 1 per side, implying symmetrical curves...sampling of the two specified curves as well as the outer face...
